

Car window treatment

Carrosserie Bussy offers a **large assortment of automotive glass tinting films** to meet your needs.

Solar films

These films act as a filter against harmful UV rays and help you keep down the temperature inside your vehicle. The various tints available also offer a good way to personalize your car.

Safe-System films

This colorless treatment laminates the glass and strengthens it so it won't crumble into pieces, thus protecting the vehicle's passengers in case of an accident or car-jacking.

Gammes disponibles et tarifs

Confidentiality films

These reflective films keep a perfect visibility on the road and protect you efficiently against unwanted looks. Combining the benefits of the sun protection treatment and that of untinted glass, confidentiality films offer optimal comfort to both driver and passengers.

Window treatment installation and prices

All films are installed by professionals only and are guaranteed for 10 years. We'll need to keep your car for a half day to perform the work.

Minibus Ex. Jumpy, Traffic, etc.	From 800

Questions fréquentes

Can I have a window treatment installed on my front windows?

No. It is illegal to deteriorate the visibility of your front windows by more than 30%. Since your original car windows are already slightly tinted, you'd definitely go over this rate should you add any tint.

The only treatment we can suggest is Safe-System, since it is perfectly transparent and colorless.

How should I clean my tinted glass ?

Use a tissue or piece of soft fabric with regular cleaner. Make sure to avoid abrasive products.

A good tip : add a drop of shower gel to a bunch of water, place this mix in a sprayer and you'll avoid « blue » traces, especially on the windshield.
